LIQUID BASE CYTOLOGY (LBC) CONSUMABLES

LBC Thinprep kits are delivered to your practice/clinic on a bi-monthly basis, in order to provide you with a sufficient supply.

It is intended to also help avoid storage of excess stock, which due to the limited shelf life of the product could result in out of date test kits being used, and will minimise wastage.

The quantity allocated to your practice for April 2017-March 2018 is based on your predicted activity for that period.

However, if you feel you are receiving too many kits or require more kits, please contact at the earliest opportunity:

Janet Williams

✉ Linda.Jarman@wales.nhs.uk

This allows us to re-use any excess stock before it goes out of date, and conversely ensure you have enough stock for taking cervical samples as required.

Many thanks

Janet Williams
